Precipitation probability							
30%	30%	50%	60%	60%	40%	40%	20%

Forecast for Monday 30 Nov 2020

Weather: Staying mainly dry overnight, however rain will move across the area in the morning and southwesterly winds will also readily pick up. Rain continuing for much of the day and becoming heavier for a time in the afternoon before easing during the evening. Eventually cloud will also begin to lift and break too.

Chance of cloud free mountain/hill tops above 800m: 20% or less chance of cloud free tops with extensive low cloud around the Snowdonia. Cloud base will generally be around 400m during the day, in the evening cloud bases will lift above the summits.

Visibility: Visibility will generally be poor in rain, it may become moderate at times in lighter rain but good views will be hard to come by and navigating may be tricky at times.

Meteorologist's View

Southwesterly winds will strengthen during the day and during the afternoon there will be some strong gusts on the mountain tops. Freezing level will fall during the evening and it will feel very chilly on Monday night.

Forecast for Tuesday 01 Dec 2020

Weather: A dry day with a mix of cloud and sunny intervals, feeling very cold on the hills in the morning, becoming increasingly cloudy during the afternoon.

Maximum wind: northerly becoming southwesterly 5-10 mph.

Chance of cloud free mountain/hill tops above 800m: 90% during the morning with most summits clear and far reaching views expected, by dusk a slightly lower chance with some fell tops being shrouded in lower cloud.

Visibility: Excellent during the morning becoming good later in the day.

Temperature: **Valleys:** Zero rising to 5 Celsius.
At 800m: Zero rising to 3 Celsius.
Freezing level: 800m rising above the summits in the evening.
